

MANAL MANZOOR

Agentic AI Designer | UI/UX | Full-Stack AI Developer

Islamabad, Pakistan • +92 301 9052602 • manalmanzoorhussain@gmail.com

[LinkedIn: /manal-manzoor](#) • [GitHub: /manalmanzoor](#)

PROFILE

Agentic AI Designer and Developer focused on turning non-linear, autonomous AI behaviors into **transparent, human-centered experiences**. Hands-on experience designing and shipping multi-modal RAG systems, dual-channel voice agents, and ML-driven web apps. Skilled at bridging the gap between intelligent agent workflows and intuitive interfaces through **Figma prototyping, human-in-the-loop controls, and trust-building UX patterns**, supported by full-stack delivery across FastAPI, React, Flutter, and Laravel.

EXPERIENCE

Artificial Intelligence Intern | AEROX ERP (Remote) *Jul 2026 - Present*

Agentic AI · Full-Stack · Chatbot Systems

- Build end-to-end AI chatbot solutions for enterprise proposals, owning both **frontend and backend** development for production deployments.
- Design conversational flows and human-in-the-loop touchpoints so users can steer, correct, and approve autonomous agent outputs with confidence.
- Prototype multi-agent proposal workflows that translate complex non-linear reasoning into clean, predictable UI states, loading, confidence, source, and error surfaces.

UI/UX Design Intern | Xoro Solutions (Remote) *Apr 2025 - Nov 2025*

Product Design · Figma · Mobile & Web

- Designed user-centric web and mobile interfaces in **Figma**, focusing on adaptive layouts, clear task hierarchies, and accessible visual patterns.
- Shipped key platforms including **TripMate** and a delivery-style mobile donation application, from wireframes to high-fidelity interactive prototypes.
- Ran usability reviews to refine non-linear, goal-based journeys and reduce friction in multi-step user flows.

FEATURED PROJECTS

Multi-Modal RAG Chatbot | "Attention Is All You Need" Explorer *2026*

FastAPI · React · RAG · Vector DB · Multi-Modal AI

- Built an **agentic multi-modal RAG chatbot** that reasons across text, tables, charts, images, and equations from the landmark Transformer paper.
- Engineered a **modern React interface** with expandable source references and inline evidence, giving users full transparency into agent reasoning and citation grounding.
- Designed UX patterns for confidence signaling and source traceability, addressing a core trust challenge in agentic AI systems.

Dualbook Voice Agent | Book a Car Wash by Talking *2026*

Voice AI · WhatsApp · Customer Memory · Analytics Console

- Designed and built a **dual-channel (Voice + WhatsApp) AI agent** with a real customer-memory layer that recalls each user's vehicle, usual service, and preferred time.
- Achieved **61% fewer turns** for returning customers by combining persistent memory with proactive, context-aware agent suggestions.
- Shipped a full **owner console** for bookings, customer management, and analytics, turning autonomous agent activity into clear, actionable oversight for the business.

Flight Delay Prediction System | ML Web Application 2025

Python · Streamlit · Machine Learning

- Engineered an ML-based web application using **Python and Streamlit** to predict flight delays with an intuitive, decision-support-oriented UI.
- Trained and evaluated multiple predictive models, **KNN, Logistic Regression, SVM, Decision Trees, and Random Forests**, surfacing model confidence directly to end users.

Blood Donation Mobile Application | Full-Stack Flutter App 2024

Flutter · Dart · Firebase

- Architected a **two-way donor-receiver platform** with real-time posting, authentication, and status tracking (accepted / rejected workflows).
- Integrated email-based communication and clean state feedback, patterns transferable to human-in-the-loop agentic workflows.

Garage Finder Web Application | PHP / Laravel 2024

PHP · Laravel · Full CRUD

- Built a **service-management platform** with full CRUD for garage listings, focusing on clean information architecture and task-oriented flows.

EDUCATION

Bachelors in Software Engineering | COMSATS University Islamabad (Wah Campus) 2023 - 2027

CGPA: 3.62 / 4.0

SKILLS

Agentic AI & UX Human-in-the-loop patterns, confidence indicators, source grounding, task handoffs, multi-agent workflow design, trust & transparency UX

AI / ML Multi-Modal RAG, Voice Agents, LLM integration, FastAPI, Python, Streamlit, Predictive Modeling (KNN, SVM, Logistic Regression, Random Forest)

Design Figma, High-Fidelity Prototyping, Usability Testing, Design Systems, Mobile & Web UI, Multi-Modal (text · voice · visual · canvas)

Development React, Flutter, Dart, PHP, Laravel, FastAPI, Full-Stack Web & Mobile Architecture

Databases & Tools Firebase (Real-time DB, Auth), Vector DBs, Git / GitHub, CRUD Systems
